Concord, New Hampshire 03301

RE: Adjustment to Renewable Portfolio Standard Class III Requirement

Dear Commissioner Chicoine:

Thank you for giving First Point Power ("FPP") an opportunity to comment on the Class III requirement adjustment. FPP is a load serving entity that supplies power in all deregulated markets in New England including New Hampshire.

2022 Adjustment

FPP has not procured any RECs to satisfy the 2022 Class III requirement in New Hampshire. FPP intends to pay the ACP for any Class III requirement. We transact with most REC brokers and generators and at no time in the past four years have Class III RECs been available for purchase at levels below the ACP in our experience. To the extent any generators have unsold inventory, the Connecticut Class 1 price remains above the New Hampshire Class III ACP and therefore we would not expect to purchase any prior to the RPS filing deadline. FPP supports reducing the requirement by the maximum permitted reduction.

Sincerely,

A handwritten signature in black ink, appearing to read "Peter Schieffelin", is written over the typed name.
