

## Consumer Information About Your Electricity Supplier

### Annual Disclosure

Electric providers are required by the New Hampshire Public Utilities Commission to provide customers with an environmental disclosure label with information to evaluate services offered by competitive suppliers and electric utilities, and to provide information about the environmental and public health impacts of electric generation. Further information can be obtained by calling your electric utility or competitive electric supplier or by contacting the Public Utilities Commission. Additional information on disclosure labels is also available at <http://www.puc.nh.gov> or on your electric provider's website.

This fact sheet provides consumer information about the price, power sources and air emissions of service provided by this electricity supplier.

#### Power Sources

October 1, 2022 – September 30, 2023

This supplier provided electricity with the following resources:

POWER SOURCES	CHAMPION MIX	SYSTEM MIX
Biomass	0.00%	1.62%
Coal	0.00%	0.21%
Hydro	0.00%	7.81%
Imported Power	0.00%	0.00%
Landfill Gas	0.00%	0.48%
Municipal Trash	0.00%	2.00%
Natural Gas	0.00%	46.22%
Nuclear	0.00%	22.59%
Oil	0.00%	4.96%
Other Renewable	0.00%	3.91%
Solar	0.00%	6.98%
Wind	0.00%	3.22%
<b>Total</b>		<b>100%</b>

#### Air Emissions

October 1, 2022 – September 30, 2023

This table identifies air emissions from this supplier's electricity mix.

SOURCE	CHAMPION MIX
Carbon Dioxide (CO <sub>2</sub> )	Unknown
Nitrogen Oxide (NO <sub>x</sub> )	Unknown
Sulfur Dioxide (SO <sub>2</sub> )	Unknown

*Emissions: Carbon Dioxide (CO<sub>2</sub>) is released when certain fuels are burned. It is considered a greenhouse gas and a major contributor to global warming. Nitrogen Oxides (NO<sub>x</sub>) form when certain fuels are burned at high temperatures. They are considered contributors to acid rain and ground-level ozone (or smog). Sulfur Dioxide (SO<sub>2</sub>) is formed when fuels containing sulfur are burned. Major health effects associated SO<sub>2</sub> include asthma, respiratory illness and have other environmental impacts. Environmental impacts differ among individual power plants.*

#### Additional Information and Required Notes:

**Power Sources:** The electricity you consume comes from the New England power grid, which receives power from a variety of power plants and transmits the power as needed to meet the requirements of all customers in New England. When you choose a power supplier, that supplier is responsible for generating and purchasing power that is added to the power grid in an amount equivalent to your electricity use. "Known Resources" include resources that are owned by, or under contract to, the supplier. "System Power" represents power purchased in the regional electricity market. Electric suppliers are required to obtain a certain amount of renewable energy in accordance with RSA 362-F, the state's renewable portfolio standard law. They may also choose to obtain amounts of renewable energy above their legal obligation.
