

STATE OF NEW HAMPSHIRE
BEFORE THE
PUBLIC UTILITIES COMMISSION

Docket No. DE 23-062

COMMUNITY POWER COALITION OF NEW HAMPSHIRE

Complaint Against Public Service Company of New Hampshire d/b/a Eversource Energy

PUBLIC SERVICE COMPANY OF NEW HAMPSHIRE d/b/a EVERSOURCE ENERGY
RESPONSE TO CPCNH COMPLAINT

On June 13, 2023, the Community Power Coalition of New Hampshire (“CPCNH” or “Coalition”) filed a complaint with the New Hampshire Public Utilities Commission (“Commission”) pursuant to New Hampshire Code of Administrative Rules Puc 2205.12(a)¹ against Public Service Company of New Hampshire d/b/a Eversource Energy (“Eversource” or the “Company”), with a corrected filing made later that night, alleging that Eversource has failed to comply with the requirements of RSA 53-E and the Puc 2200 rules (the “Complaint”). The Complaint also cites to “certain disputes” between CPCNH and Eversource which, combined with the alleged non-compliance, “substantially delayed the launch of the Coalition’s power supply service for most of the month of April (thereby foregoing an estimated \$4,380,000 in NH ratepayer “potential cost savings”) and have foreclosed the Coalition’s ability to serve Net Metered customers or to offer advanced rate structures.” (Complaint at 2).

This response provides detailed responses disputing the various allegations of non-compliance with the Puc 2200 rules, but as an overarching matter Eversource would like to make it abundantly clear that at no time did the Company in any way delay the launch of the Coalition’s operations for any of its member aggregations (“CPAs”). Much the opposite, Eversource went above and beyond, meeting extensively with CPCNH representatives and vendors at length beginning as early as December 8, 2022,² when Eversource staff met with CPCNH representatives and the Coalition’s contracted load serving entity (“LSE”) to discuss Eversource’s EDI processes and any issues that the Coalition may have had regarding the EDI processes. At that meeting, Eversource clearly presented the timeline for Eversource EDI testing, as well as factors that may impact timing, and the various requirements for EDI testing, including the fact that each member CPA had to undergo EDI testing before enrolling customers

¹ The Coalition’s complaint fails to cite to the proper rule provisions that authorize such a complaint. Presumably the Coalition intended to cite to Puc 2205.12(b) and Puc 204, rather than Puc 2205.12(a), as Puc 2205.12(b) provides the directive on how to file complaints regarding a CPA’s or utility’s compliance with the Puc 2200 rules, specifically that “[c]omplaints submitted to the commission under these rules shall be made pursuant to Puc 204.”

² While discussions date back even further than the December 8, 2022 meeting, Eversource provided its EDI enrollment and testing information and instructions to CPCNH’s load serving entity (“LSE”), Calpine, via email on December 6, 2022, included with this response as Attachment A. Eversource then met with Calpine and Coalition representatives on December 8.

and providing the Coalition and its LSE guidance on how to best navigate the EDI testing process so that the Coalition could ensure timely launch of its member CPAs.³

All of Eversource's EDI processes and requirements are standard for any competitive supplier that works with Eversource, which is consistent with the mandate of Puc 2204.06(b)(1), which requires "[e]ach CPA that will serve customer loads as an LSE, or its contracted service provider for customer enrollment, shall: *[a]pply to and successfully complete the testing required to use each utility's EDI in the same manner and on the same terms as a CEPS*" (emphasis added). The Complaint's characterization of the Eversource testing process as "excessively cumbersome and time consuming"⁴ is a purely subjective statement and not a violation of the Puc 2200 rules, nor was it the cause of delayed launches of any Coalition member CPAs because, as noted above, both the Coalition and its contracted LSE were on notice about all of Eversource's EDI testing requirements at the beginning of December, months before the Coalition's desired launch of its first member CPAs.⁵ Moreover, Eversource had to provide Calpine with repeated, duplicative explanations of Eversource's EDI requirements over the following months, as late as the end of March, detailed further in the following paragraph.

Since the meeting on December 8, over the course of several months, Eversource has answered countless questions via email⁶ to provide further guidance in navigating Eversource's EDI and supplier enrollment processes, including providing proactive reminders about the Company's requirements for suppliers to begin service, all to help ensure the CPCNH member CPAs launched on the Coalition's desired schedule.⁷ The Coalition's Complaint of \$4,380,000 in foregone "potential cost savings" not only lacks any factual support but is also categorically untrue because Eversource did nothing to impede the launch of any Coalition member CPA. If anything, Eversource facilitated the Coalition members' launch and prevented any further delay created by the Coalition and its LSE Calpine by providing timely responses to all questions and emails and helped Calpine work through numerous errors, conflicting directions and confusion on its part, including the failure to provide nine out of ten Supplier Services Agreements

³ On February 2, 2023, Eversource reminded Calpine via email, included as Attachment B, that separate set ups and testing were required for each Coalition member CPA (page 2), and which Calpine acknowledged needed addressing (page 1).

⁴ Complaint at 4.

⁵ By comparison, the four CPAs managed by Good Energy and Standard Power in Eversource service territory all launched in a timely manner and without complaint.

⁶ See Attachment C. This attachment serves as a representative sample of emails demonstrating the good faith efforts of the Company to aid the Coalition in launching its member CPAs. Only a sample is provided because in just over six months since providing the Coalition's LSE Calpine with Eversource's EDI testing requirements, Eversource has received over 200 emails from Calpine alone. This number does not include emails from the Coalition itself.

⁷ See Attachment D, page 1 of 2, a reminder email from Eversource to CPCNH upon notice to Eversource and the Commission by CPCNH of commencement of services for 10 member CPAs. The reminder notes that Eversource had only received one Supplier Services Agreement—a prerequisite for EDI testing—and that separate agreements were needed for each of the remaining nine CPAs. It also notes that each member CPA must undergo EDI testing, and that Eversource would make efforts to expedite such testing to the extent possible. See also Attachment C, page 85 for the same reminder sent to the Coalition's LSE, Calpine.

(“SSAs”) for the ten member CPAs the Coalition desired for its original launch despite repeated requests from Eversource reminding Calpine that the SSAs were necessary to complete EDI testing.⁸ *Calpine finally provided the nine SSAs on April 13, 2023, approximately four months after Eversource first provided its EDI testing and supplier set up process instructions to Calpine and Calpine provided one of the ten required SSAs, and just 11 days before Calpine wanted to begin enrolling Coalition member CPA customers for all ten member CPAs.*⁹ Despite the Complaint’s unsupported allegations to the contrary it was not Eversource but CPCNH and its vendors’ dilatory actions, mistakes, and persistent misunderstandings in the face of repeated explanations and consultations by Eversource on the set up and EDI testing process that are solely attributable to any undue delay of Coalition member CPA launches.¹⁰

Also contrary to the implications of the Complaint, there is no incentive or benefit for Eversource to “systematically advantage its default service by not providing comparable meter data and rate and billing options to CPA default service that it provides to its own default and/or distribution service as expected by the relevant law and PUC order” as alleged in the Complaint on page 3, and no such preferential treatment has or is occurring. Eversource has been and continues to be supportive of municipal aggregation in New Hampshire and is making every effort to enable aggregations for New Hampshire communities. Any limited technological or practical limitations on the part of Eversource, also discussed in more detail below, are simply that—practical limitations—and not an effort to thwart the success of CPAs. Which is why Eversource, along with the other New Hampshire electric utilities, is actively seeking a navigable solution to those limited technological and logistical hurdles.¹¹

As the Joint Utilities noted in the Puc 2200 rulemaking Docket No. DRM 21-142, these limitations would incur costs and require efforts that would take time before they could eventually be surmounted.¹² But since the Puc 2200 rules were adopted, Eversource has only acted in good faith and made all reasonable efforts to comply with the Puc 2200 rules and facilitate the launch of CPAs in New Hampshire. For these reasons and the reasons further stated below, Eversource disputes the CPCNH complaint outright and in its entirety. In support

⁸ Attachment C, pages 75, 78, 79, 81, 84, and 86; Attachment B; Attachment D.

⁹ Attachment C, pages 19, 24 and 150.

¹⁰ See Attachment C, page 146, in which Calpine apologizes for taking approximately two months to execute the Eversource SSA for just one Coalition member CPA, which is just one step in the process of Eversource supplier set up and EDI testing. As mentioned above, the remaining nine SSAs were not provided until four months after completion of this first SSA, on April 13, 2023. See also, FNs 6-9.

¹¹ See Petition and Direct Testimony of the Joint Utilities in Docket No. DE 23-063 *Joint Utilities' Petition for Waiver of Certain Provisions of the Puc 2200 Rules* (discussing in detail how to provide net meter data, enable net metering programs by CPAs, and provide complete, “bill-ready” billing as contemplated by Puc 2205.16(d)(1)).

¹² See Petition of the Joint Utilities in Docket No. DE 23-063 at 4 (citing the closing of the reply comments in the rulemaking Docket No. DRM 21-142, where the Joint Utilities stated “The rules to implement CPAs in New Hampshire have been the subject of a very lengthy process where there remain some differences of opinion on implementation and where certain technical or financial challenges exist. The Commission may wish to consider establishing a timeline for revising the rules following their implementation to determine whether adjustments are necessary to manage the costs and complexities generated by the program”).

of this position and to provide a clear and fulsome response to the Complaint, Eversource addresses the Complaint sequentially by paragraph in the order in which it was presented.

SECTION 1

1.1-1.9: These paragraphs discuss CPCNH’s grievances with Eversource’s SSA that the Company uses to contract with competitive suppliers of electricity, including CPAs. In sum, the Complaint alleges that Eversource’s policies regarding the SSA and the fact that the Company would not negotiate the terms of the SSA with CPCNH resulted in “notice of commencement of service [to be] delayed by approximately 3-4 weeks.” (Complaint at 3). Eversource’s policy is to enter into the SSA with the entity that supplies the power to the customer—namely the Load Serving Entity (“LSE”)—as that is the proper party with which to contract for electric supply services. This is supported by the Puc 2200 rules to the extent that Puc 2202.14 defines an LSE as “an entity that is registered with ISO-NE as a market participant and secures and sells electric energy and related services to serve the demand of end-use customers at the distribution level” and that Puc 2202.12 defines “Enrollment” to mean “the commencement of a customer’s electricity supply service *from a CPA serving as an LSE, or a CEPS serving a CPA under contract*, effective on the meter read date described in Puc 2004.10(a) following successful EDI notification *by a CEPS or a CPA serving as an LSE* to the utility.” Throughout the Puc 2200 rules references are made to either CEPS or CPAs, but regardless of which, the entity supplying power to the customer is consistently referred to as serving as an LSE. CPCNH is not currently, nor to the Company’s knowledge is it in the process of becoming an LSE, and so the appropriate party to sign the SSA consistent with the Puc 2200 rules was whichever entity was the LSE supplying power to CPCNH member CPA customers.

Contrary to the Complaint’s allegations, it was the Coalition that delayed the progression of getting an SSA executed with Eversource by insisting the Coalition be the party signing the SSA. At no time did Eversource’s SSA, or Eversource’s position on which entity should sign the SSA, impede CPCNH’s ability to launch or slow down its timeline to serve its customers. This is evidenced by the fact that once the Coalition’s LSE Calpine executed the SSA, the set up process moved forward—the fact that Calpine, and not the Coalition, was the signatory to the SSA had no material impact on the timing of the supplier set up and EDI testing processes. So not only do the Puc 2200 rules support the fact that the Coalition was and is still not the appropriate signatory to the SSA, the Coalition could have had its LSE execute the SSA at any time, which would have avoided delays, since the Coalition’s LSE Calpine was informed of all steps for completing supplier set up and had been involved in the meetings with the Coalition and Eversource dating back to December, as mentioned above.¹³ Moreover, Calpine executed the first SSA at the end of January, so there is no basis for the Complaint’s assertion that the Company’s SSA created any delay in the launch of the first group of Coalition member CPAs.¹⁴ Had Calpine proceeded to execute the remaining nine SSAs, as it was well aware it needed to do, all set ups could have moved forward at the end of January, which was plenty of time for CPCNH to launch those CPAs in April.

¹³ See FNs 1, 2, 8, and 9.

¹⁴ See FN 10.

As for negotiating or editing the SSA, the Puc 2200 rules do not govern a utility's SSA terms or how a utility chooses to administer its SSA. In Eversource's case the SSA is governed by its tariff, and as such are administered accordingly and consistent with the application of all tariff provisions, terms and conditions, which is to say that no entity or customer be treated differently than any other; tariff conditions are applied uniformly, except in the case of a special contract as authorized by RSA 378:18 and approved by the Commission.

Regardless, that Eversource did not negotiate the terms of its SSA with CPCNH in no way delayed the launch of any CPCNH member CPAs, as the Coalition was free to have its LSE execute the SSA at any time and proceed with the set up and enrollment to supply energy to its member CPAs.

INDIVIDUAL ALLEGATION RESPONSES

1.10 and 1.11: CPCNH alleges Eversource is required to provide “exported surplus power to the grid” for individual customers pursuant to Puc 2204.02(a)(2), because Puc 2203.02(d) states “[a]ll customer usage data provided by the utility shall include consumption power delivered to customers and exports to the grid from customer generators in kWh for each reported interval.”

Response: Puc 2203.02(d) does not control other provisions of the Puc 2200 rules, and therefore Eversource is compliant with Puc 2204.02(a)(2). Puc 2203.02(d) makes no reference that it applies to any other section, and likewise Puc 2204.02(a)(2) does not cross reference to Puc 2203.02(d). CPCNH's allegation implies that Puc 2203.02(d) operates as a definition, but there is nothing that supports such an interpretation, and there is no universal definition for “usage data” in the definitions of the Puc 2200 rules. Eversource is complying with both Puc 2203.02(d) and Puc 2204.02(a)(2). However, since Eversource is aware of the desire of CPCNH to obtain such data, the Company has begun the work necessary to provide such data in the Puc 2204.02(a)(2) report voluntarily, and currently estimates that this new data can be offered starting September 1, 2023. However, Eversource still respectfully seeks Commission clarification on the interpretation of these provisions in relation to the provision of customer export data (*See Joint Utility Petition for Waiver of Certain Provisions of the Puc 2200 Rules* at 9-11, Docket No. DE 23-063).

1.12: CPCNH alleges that Eversource is unable to comply with the obligations of Puc 2205.15(b) and RSA 362-A:9, II.

Response: Both RSA 362-A:9 and Puc 2205.15(b) are enabling provisions: they give CPAs the ability to offer net metering programs, but do not create explicit obligations for the utility, therefore Eversource cannot be in violation of either provision. Moreover, as noted in the quoted language from the CPCNH complaint, “[s]uch output shall be accounted for as a reduction to the customer-generators' electricity supplier's wholesale load obligation for energy supply as a load service entity, net of any applicable line loss adjustments, ***as approved by the commission.***” (emphasis added).

No such net metering program has even been proposed to the Commission, let alone approved. Without a Commission-approved CPA net metering program, there is no service or functionality for the utility to provide. Only once provided with guidance from the directive of a

Commission order approving such a plan would the utility know how to proceed to enable the functionality and content of a CPA net metering program.

Eversource notes, however, that any such net metering program would also require Electronic Data Interchange (“EDI”) modifications, and those modifications would impact all competitive suppliers and CPAs as EDI changes should be uniform or would otherwise require the creation of new, complex and complicated computer code that would increase the risk of operational disruption to suppliers throughout the Eversource service territory. Therefore, the EBT working group would have to be convened (by order of the Commission) to ensure any changes to EDI are done in a way that does not disrupt the operations of other competitive suppliers and CPAs.

1.13: CPCNH alleges that Eversource is not complying with its obligation to provide negative usage data to competitive suppliers pursuant to Chapter 261 of the N.H. Laws of 1998, and Commission Order No. 22,191.

Response: Neither of the authorities cited contains such an obligation, nor has any competitive supplier since the enactment of the statute ever requested negative usage data. Chapter 261 of the N.H. Laws of 1998 (RSA 362-A:1) is the Limited Electrical Energy Producers Act, which is another enabling statute. There is no obligation of the utility to provide negative usage data to competitive suppliers in this statute. Order No. 22,191 is a procedural order ruling on intervention motions and approving a procedural schedule, so it is not clear why the complaint cites to this order. Regarding the provision of net metering data to CPAs, Eversource refers to the *Joint Utility Petition for Waiver of Certain Provisions of the Puc 2200 Rules* at pages 9-11, Docket No. DE 23-063 (respectfully requesting the Commission’s interpretation of the applicability of Puc 2203.02(d) regarding the provision of customer generator export data).

1.14: CPCNH alleges that Eversource is not providing large C&I customers’ hourly meter data or time-of-use customer data, because Puc 2204.02(a)(2) requires the provision of usage data “for each reported interval”.

Response: Eversource is complying with Puc 2204.02(a)(2). Eversource provides hourly interval data for large C&I customers through subscriptions for Energy Profiler Online (“EPO”), and only through EPO, consistent with the Eversource tariff. Eversource billing systems do not have direct access to this raw meter data, as the metering system of record, MV90, feeds billing information, to the Eversource billing systems. Eversource does not interpret Puc 2204.02(a)(2) to require reporting usage data by TOU period, as TOU periods are not “reported intervals”. Eversource reports data to its TOU customers using a monthly interval, and does not report such data by the peak and off-peak TOU periods.

1.15: CPCNH alleges that Eversource is not providing TOU usage data as required by Puc 2205.13(a)(7), nor is Eversource identifying customers by “a TOU rate class” such as R-OTOD, R-OTOD-2, G-OTOD, and EV-2 “as is implied” by Puc 2205.13(a)(4).

Response: Eversource is complying with Puc 2205.13(a)(7) and Puc 2205.13(a)(4). Puc 2205.13(a)(7), requires “[t]he most recent 24 months, if available, or 12 months otherwise, of

usage data in kWh for each monthly interval for accounts reported in monthly intervals for load settlement, and for each hourly interval for accounts reported in hourly intervals for load settlement.”

Puc 2205.13(a)(7) does not require that usage data for TOU customers be provided by TOU period—it requires either monthly or hourly reporting. Eversource is providing monthly usage data for TOU customers consistent with the requirements of Puc 2205.13(a)(7).

Puc 2205.13(a)(4) states that the utility shall provide the “utility rate class” for each customer. TOU customers are a subset of a rate class, they do not comprise a rate class (i.e. R-OTOD-2 (residential TOU rate) is a subset of and designed according to the cost to serve Rate class R. Same applies for G-OTOD and Rate Class G). Eversource is providing the general rate class to which TOU customers belong, and so is complying with Puc 2205.13(a)(7). That CPCNH believes Puc 2205.13(a)(7) “implies” that TOU customers should be identified as such does not create an obligation for the utility to do so. However, Eversource has voluntarily chosen, along with making the necessary billing and IT changes necessary to provide net metering customer export data, to also make the changes necessary to provide TOU customer data by TOU period, which is to say peak and off-peak kWh. Eversource has already begun this work and currently estimates that work will be complete and the changes ready to implement by September 1, 2023.

1.16: CPCNH alleges Eversource does not have the capability to allow CPAs to use their [Eversource’s] TOU rate structure to offer a TOU supply rate to TOU rate customers, “as was called for” by Puc Order No. 22,191 and “is implied by” Puc 2205.16(c)(2).

Puc 2205.16(c)(2) provides the following:

(2) Allow a CPA to define on-peak, mid-peak, and off-peak periods or other pricing options and rate structures that are different from those defined in the utility’s applicable tariffs on file with the commission, and to request enhanced metering services for customers to participate in programs and services beyond the provision of basic electricity supply service, **provided that:**

a. The requested rate structures, customer class definitions, and availability requirements are within the capabilities of the utility’s billing system, customer information system or meter data management system;

b. The requested modifications do not preclude collection of billing determinants required by the utility, or else are implemented subject to the commission finding it is in the public good; and

c. All incremental costs incurred to provide any special metering, data management, or billing system modifications shall be assigned to and paid by the CPA, in which case such costs shall be:

1. Estimated by the utility to the CPA prior to the start of implementing such changes; and

2. If approved for implementation by the CPA, shall be charged to and paid by the CPA.

Response: As mentioned above, Order No. 22,191 is a procedural order ruling on intervention motions and approving a procedural schedule, it does not “call for” the utility to do anything.

Regarding 2205.16(c)(2), CPCNH has not proposed such a rate structure to Eversource, so there is no way to know how to apply Puc 2205.16(c)(2), nor could there be any violation of it to date. And even if it had, Eversource currently offers no rate with TOU for the supply portion of the rate, and so it would not be possible for CPCNH to use Eversource's TOU rate structure. Please see response to 5.1 for further details.

1.17: The Complaint alleges that Eversource's non-compliance with the Puc 2200 rules has made it "impossible for CPCNH to enroll such customers successfully and to serve [net metering and TOU customers] responsibly.

Response: Eversource maintains that it is not violating the Puc 2200 rules. Please also refer to the responses for paragraphs 1.11-1.17.

1.18: CPCNH states that Eversource does not intend to provide hourly usage data for customers whose load is settled on an hourly basis, contrary to Puc 2205.13(a)(7).

Response: Please refer to the response for 1.14.

1.19: CPCNH alleges Eversource has not enabled the billing option described in Puc 2205.16(d)(1).

Response: CPCNH has not attempted or made a request to avail itself of the billing option in Puc 2205.16(d)(1) to date. Regardless, no utility currently has the functionality to provide the Puc 2205.16(d)(1) functionality, and so the New Hampshire electric utilities are seeking either a temporary or permanent waiver from this provision of the rules, depending on the Commission's judgment regarding the required work to implement this provision. *See Joint Utility Petition for Waiver of Certain Provisions of the Puc 2200 rules*, Docket No. DE 23-063.

1.20: Contains no specific allegation of a violation.

1.21: CPCNH alleges Eversource is discriminating against CPCNH service in favor of Eversource's default service by "prorating individual customer monthly loads across calendar months (on a per diem basis) so that monthly rates end up prorated between calendar months but will not do likewise for Coalition provided default service contrary to the intent of Puc 2205.16..."

Response: Eversource does not believe that Puc 2205.16 addresses "prorating individual customer loads across calendar months (on a per diem basis) so that monthly rates end up prorated between calendar months." Regardless, CPCNH has never asked Eversource if it could provide this functionality. If CPCNH had asked the Company, Eversource could have informed the Coalition that it is capable of accommodating this functionality for those customers in Eversource's C2 system, which serves all but approximately 2,200 Eversource customers; however, the Company still believes that this functionality is not required by Puc 2205.16.

SECTION 2:

Like paragraphs 1.1-1.9, this section again discusses CPCNH’s grievances with Eversource’s SSA. Eversource would therefore please refer the Commission to the response for paragraphs 1.1-1.9.

SECTION 3:

Section 3 of the CPCNH complaint makes further allegations about Eversource’s obligation to provide net metering customers’ usage data – specifically negative usage, or export, data. Eversource reiterates its position in the response to paragraph 1.11 that negative usage/export data is only required to be provided pursuant to Puc 2203.02(d), and nowhere else. Regarding assertions that “usage data” be interpreted to mean both positive usage and negative export customer data, Eversource refers to the *Joint Utility Petition for Waiver of Certain Provisions of the Puc 2200 Rules* at pages 9-11, Docket No. DE 23-063, and also to the response for paragraphs 1.10 and 1.11.

SECTION 4:

Section 4 of the CPCNH complaint further discusses interval data. Eversource would please refer the Commission to the responses provided to Sections 1.14 and 1.15.

SECTION 5:

Section 5 of the CPCNH complaint further discusses the obligation of Eversource to enable TOU rates.

5.1: The Complaint alleges that “CPCNH has received confirmation that Eversource will not support complete consolidated billing for CPA supply rates that vary by TOU period, pursuant to Puc 2205.16(a)(2) — even if the CPA’s TOU rate is based on the same 2-part on-peak and off-peak periods as Eversource’s TOU rate (for distribution components of customer bills), which the CPA would provide to Eversource in advance of enrolling customers pursuant to Puc 2205.16(d)(2).” (Complaint at pages 16-17).

Response: The Complaint’s claim that “CPCNH received confirmation that Eversource will not support complete consolidated billing for CPA supply rates that vary by TOU period, pursuant to Puc 2205.16(a)(2) — even if the CPA’s TOU rate is based on the same 2-part on-peak and off-peak periods as Eversource’s TOU rate” is in error.

Eversource currently has 44 customers on the only TOU rate it offers residential customers, R-OTOD-2. For C&I customers, there are approximately 35 small and 118 large C&I customers on a TOU rate (G-OTOD and LG, respectively). No Eversource TOU rate has time differentiated, or peak and off-peak period, supply pricing for either default service or competitive suppliers.¹⁵ Any TOU rates that CPCNH wanted to offer to customers of its member CPAs that were “the same 2-part on-peak and off-peak periods as Eversource’s TOU rate” would only have peak and off-peak periods for transmission and distribution, not for supply. It is unclear how the Coalition could design a rate that is “the same” as Eversource’s

¹⁵ See Public Service Company of New Hampshire d/b/a Eversource Energy, Tariff for Electric Delivery Service NHPUC No. 10, pages 45, 55, 66, and 67 (showing each of Eversource’s current TOU rates, none of which have peak/off-peak periods for supply).

TOU rates, since the Coalition can only design rates for the supply portion of the bill, and Eversource has no TOU-period rates for the supply portion of the rate for any customers.

Putting aside for the moment that Eversource does not currently offer any peak and off-peak periods for the supply portion of any customer rates, to enroll in the existing TOU rates (which only apply to the transmission and distribution rate components) requires a special meter. Residential TOU customers require meters set to the TOU periods, and the large C&I customers require interval meters that record at half-hour intervals. To offer TOU rates to a non-TOU rate customer with the same peak and off-peak periods, the customer would have to request, and Eversource would have to install a TOU meter to offer such rates, and even then the Eversource billing systems are only presently configured to offer peak and off-peak periods for the transmission and distribution components of the rate, not supply. No meters have been requested by CPCNH or any CPCNH member CPA customers at this time.¹⁶ If the Coalition is concerned that existing Eversource TOU customers will not receive the TOU rate if served by the Coalition, that is a mistaken assumption. Eversource TOU customers will still receive their peak and off-peak transmission and distribution rates if their supply is provided by the Coalition member CPA or any other CPA, so there is no impediment to CPCNH serving Eversource TOU customers.

If CPCNH wishes to offer peak and off-peak periods for supply, as mentioned above there are no current Eversource TOU rates that have peak and off-peak supply periods.¹⁷ Therefore any such rate designs offering peak and off-peak supply pricing would be “different than those defined in the utility’s applicable tariffs on file with the commission,” as stated in Puc 2205.16(c)(2), and that provision and its various requirements for proposing such rate structures would govern.¹⁸ No such proposals have been submitted to Eversource by CPCNH.

5.2: The Complaint alleges that “Eversource has not explained why its billing system is incapable of providing customers on CPA-provided default service with the same pricing options available to customers on utility-provided default service.”

Response: Please see the response to paragraph 5.1.

5.3: This section of the Complaint refers to Puc 2205.16(d)(1), from which Eversource, along with the other electric utilities of New Hampshire, is currently seeking a waiver *See Joint Utility Petition for Waiver of Certain Provisions of the Puc 2200 Rules*, Docket No. DE 23-063.

¹⁶ Eversource notes that if CPAs wish to install a separate meter for their own meter reading purposes, Puc 2205.14 requires the CPA to not only propose and reach agreement with the utility regarding purchase, ownership and reading the meter, both the CPA and the utility must bring the proposal to the Commission for adjudication and approval.

¹⁷ See Testimony of Dennis E. Moore, Brian J. Rice and Michael R. Goldman, Bates page 24, lines 17-22, Docket No. DE 20-170, Tab 36.

¹⁸ Puc 2205.16(c)(2) has three requirements for CPA rate proposals that are differently structured from the utility’s current tariffed rates: “a. The requested rate structures, customer class definitions, and availability requirements are within the capabilities of the utility’s billing system, customer information system or meter data management system; b. The requested modifications do not preclude collection of billing determinants required by the utility, or else are implemented subject to the commission finding it is in the public good; and c. All incremental costs incurred to provide any special metering, data management, or billing system modifications shall be assigned to and paid by the CPA”

SECTION 6:

Section 6 of the CPCNH complaint alleges that Eversource did not properly anonymize data pursuant to Puc 2203.02 and 2204.02.

6.3.1 Response: Eversource noted in its transmittal emails to both the Enfield and Canterbury CPAs for the Puc 2203.02 and 2204.02 reports that the R and G Rate classes had been combined into one class for anonymization purposes; the transmittal emails are included with this response as Attachment E. There is nothing in Puc 2203.02 that “requires Eversource to clearly identify data representing multiple rate groups by reporting it *“as the combined rate classes”*” (emphasis in original from complaint). Therefore, Eversource disputes that this constitutes a violation of Puc 2203.02 or 2204.02.

6.4-6.5 Response: While there is nothing in Puc 2203.02 that requires the identification in the report of anonymized data, and Eversource did identify such data as anonymized in the transmittal emails sent to the Enfield and Canterbury CPAs, Eversource is able and willing to add identifying language for such data in the report on a moving forward basis.

CONCLUSION

For all of the above reasons, Eversource reiterates that it disputes the Complaint in its entirety as baseless, as Eversource has demonstrated that it has and continues to comply with all provisions of the Puc 2200 rules with which it is able, and in good faith, and for those with which the Company is not capable of complying, the Company has received or is actively seeking waivers. Regarding net metering individual customer export data and offering the billing option presented in Puc 2205.16(d)(1), the Company is addressing both of those issues in conjunction with the other New Hampshire electric utilities in Docket No. DE 23-063. Therefore, Eversource respectfully requests that the Commission find that there is no valid claim to a Puc 2200 rule violation by Eversource and close this docket. The Company thanks the Commission for its consideration of this response.

Good afternoon Joby.

Thank you for contacting us. I look forward to working with you on this newest supplier set up.

Although Calpine Energy Solutions already exists on our NH supplier table, a new supplier set up will need to be processed prior to EDI testing.

The Supplier Training Presentation will be reviewed just prior to the move to EDI production.

Attachments:

- Attachment 1 - NH Supplier EDI Trading Partner Worksheet
- Attachment 2 - Eversource EDI Trading Partner Worksheet
- Attachment 3 - W9 - PSNH dba Eversource Energy
- Attachment 4 - Supplier Training Presentation - (Please provide a copy of the certificate if already completed in NH)

Please use the below information to begin the process of becoming a new supplier in the Eversource territory in NH.

All documents must be provided by e-mail.

Required prior to scheduling EDI testing.

- An original digitally signed Electric Supplier Services Master Agreement pdf. See link below.
- EDI Trading partner worksheet.
- 3 supplier rates for EDI testing (template will be provided after Electric Supplier Services Master Agreement has been received).

While EDI testing:

- Provide a completed ISO-NE Load Asset Registration Load Form (LARF).
- Provide a W9 (tax identification form).

EDI testing completed:

- Eversource provides EDI Certificate and Letter to Supplier.
- Eversource provides Supplier Training Presentation Letter to Supplier.
- Supplier provides EDI Certificate to NH-PUC to complete NH-PUC registration.

- Supplier provides NH-PUC registration completion letter to Eversource.

Supplier moved to EDI Production:

- After all documents are received by Eversource.

Electric Supplier Services Master Agreement

<https://www.eversource.com/Content/nh/about/doing-business-with-us/energy-supplier-information/electric---new-hampshire>

W9 Taxpayer Identification form

<http://www.irs.gov/pub/irs-pdf/fw9.pdf>

ISO-NE Information

<https://www.eversource.com/Content/nh/about/doing-business-with-us/energy-supplier-information/electric---new-hampshire>

EDI Standards are found on the National Grid website

<https://www9.nationalgridus.com/masselectric/ebt/index.asp>

Please go to section listed as: Version 4010 EDI Implementation Guides

Additional Information:

The following is offered; LDC - **Rate Ready** Consolidated Billing (Eversource NH bills for the supplier) and Dual Billing (supplier does their own billing).

Currently, Purchase of Receivables (**POR**) is not available.

When a customer pays a supplier portion of the cycle bill, an 820 is sent to the supplier that night.

Payments received from customers, for a supplier's amount billed, are paid to suppliers by **ACH** three (3) business days after the customer's payment posts to the account.

Taxes are **not** applied to any supplier dollars in NH. Customers are billed / assessed the NH Electricity Consumption Tax based on their delivery kWh and is paid directly to Eversource NH and then remitted to the State of NH.

In 2018, the NH-PUC issued Order No. 26,132 which directed a change that would apply the **EAP discount** to those on competitive supply. As part of that order, the PUC determined not to amend the supplier rules because the change was a directive to utilities and not a directive to suppliers.

Supplier services team,

We do business with you already as Calpine Energy Solutions. Now we are setting up another entity named "Calpine Community Energy" and the commission has asked us to complete EDI testing as part of the requirements. Can you please let us know what is the earliest you can schedule us? Hoping we can do an abbreviated version of the test since are already in production with you.

Please let us know if there is a different email address we need to reach out to get the process started.

Thank you,

Joby

Joby,

Thank you for the rates.

Only the first three will be added.

Full separate EDI testing does need to be done for each new set up.

However, after the first few, abbreviated versions of EDIs should be able to be done.

Hi Bryan.

At one of the meetings with Calpine Community Energy, we were informed by a CCE, that Calpine Solutions and CCE was separate entities and were also informed that CCE would set up separate asset ids for each town.

The supplier training is necessary even if it is a review for Calpine.

The supplier training presentation will need to be reviewed which typically takes 30 to 60 minutes.

Additionally, the completion certificate is a requirement by the Commission.

Thank you,
Aaron

Hi Aaron,

Just to confirm, and we're happy to figure it out if need be, but even though CCE is more or less the same company as Solutions, it is necessary to have someone re-attend the supplier training?

Thanks again,
Bryan

Thank you, Bryan.

Prior to the move to EDI production, we will need to review the supplier training presentation with someone from Calpine Community Energy.

Once reviewed, a certificate of completion is provided that will be needed when registering with the Commission.

The review typically takes 30 - 60 minutes.

Thank you,
Aaron

Hi Aaron,

I did want to follow up on one point which is to say that CCE is more or less Solutions for practical purposes. It has all the same personnel, management, and infrastructure. It was just created in order to keep the brands separate.

Thank you,
Bryan

Good afternoon, Bryan.

In order to begin the supplier set up on our billing systems, we need EDI Trading partner worksheet for Calpine Community Energy.

Additionally, please provide the W9 (tax identification form).

Once the above have been provided, IT tickets will be submitted to begin the process of setting up Calpine Community Energy on our two billing systems and for EDI testing after the set ups are complete.

Regarding page 19 listing number 9. Supplier training was previously attended by Calpine Solutions but it was explained to us that Calpine Community Energy is not part of Calpine Solutions so it appears the supplier training will need to be reviewed just prior to the move to EDI production.

Attached is the supplier rate addition template that is used only for the account number prefix 800 accounts.

Please provide 3 rates that will be used while EDI testing the prefix 800 accounts (attachment).

Good afternoon.

Currently the supplier's name set up for each municipality has been set up as, for an example, Nashua Community Power.

We will change the order of the supplier's name to, as an example, Community Power Nashua.

The below information will also be used for each CPCNH aggregation setup.

Info@CommunityPowerNH.gov

866-603-7697

Thank you,

Aaron

Good evening Aaron,

Eversource should present the following supplier name and contact information on all CPCNH CPA customer bills (for the Cities of Nashua and Portsmouth and the towns of Enfield, Peterborough, Rye, Harrisville, Hanover, Canterbury, and Plainfield):

Community Power
Info@CommunityPowerNH.gov
866-603-7697

As context:

1) The above toll-free number and email address direct customer inquiries to Calpine's customer contact center, pursuant to CPCNH's contract with Calpine and consistent with Puc 2205.16(c)(1). CPCNH's PO Box is not associated with or routed to Calpine's customer contact center and would not be appropriate to present on bills in lieu of our customer service contact information (Info@CommunityPowerNH.gov and 866-603-7697). It would also seem to risk having bill payments sent to that address.

2) The above name "Community Power" is a New Hampshire trade name owned by CPCNH, which permits CPCNH to conduct business in NH under just that name. CPCNH's Board of Directors has authorized Calpine to use "Community Power" as our supplier identifier for purposes of presentation on customer bills in Eversource's service territory, regardless of which CPA program the customer is served by. Consequently, all CPCNH CPA mailed notifications advised customers to expect to see "Community Power" as their supplier name listed on Eversource bills. I have discussed this issue with Amanda Noonan at DOE, and she concurs that the use of "Community Power" would be appropriate for presentation on CPCNH CPA customer bills. This is exactly what Liberty is planning to present. You may refer to the NH Secretary of State website here for confirmation that CPCNH owns the trade name "Community Power": <https://quickstart.sos.nh.gov/online/BusinessInquire/BusinessInformation?businessID=758617>

Subsequent to your receipt, and written confirmation in response to these instructions, please continue to direct any future inquiries Eversource may have regarding CPA customer bill presentation to CPCNH (myself and Samuel) while copying Calpine.

Thank you,

Good evening Eversource Team,

Please consider this a formal request to update Supplier name on invoice display for all Clean Power Coalition New Hampshire DUNS+4 to the Supplier name "Community Power". This is a registered trade name with NH Secretary of State owned by the Coalition. "CPCNH" is not an acceptable identifier on customer bills as it is not a registered trade name.

Good morning, Paula.

Thank you for providing an updated billing system set up and EDI testing priority list.

Nashua, Plainfield, and Rye have now been setup on the prefix 800 account billing system. The other four (4) will be added soon.

In addition, the new rates requested have been added to the NH Eversource supplier rate table for Nashua, Plainfield, and Rye, and can be used once the connectivity testing has been completed for each Plus 4 setup. The other four (4) rates will be added soon.

Nashua's and Enfield's Plus 4 have remained the same (Nashua with 0007, Enfield with 9999). Thank you for the updated rates Friday afternoon.

Hi Aaron,

Thank you for updating the rate template! I wanted to get these updated Rate Sheets back to you as quickly as possible although we may still be determining the correct +4 for Enfield and Nashua. We completed these assuming Enfield and Nashua will switch DUNS+4 and use the updates in yellow below. If this ends up being incorrect, we can adjust and resubmit asap.

Town	Phase	Original	Updated
		DUNS+4	DUNS+4
Enfield	1	9999	0007
Hanover	1	0004	0004
Harrisville	1	0005	0005
Nashua	1	0007	9999
Peterborough	1	0008	0008
Plainfield	1	0009	0009
Rye	1	0011	0011

The order of priority for adding these prices is as follows:

- a. Nashua
- b. Plainfield
- c. Rye
- d. Harrisville
- e. Enfield
- f. Peterborough
- g. Hanover – not needed until 5/15

Thank you!
Paula

Hi Aaron,

Thank you so much for sending over the updated rate sheet for CCE! Please see attached for our initial submission for rates on behalf of CPCNH.

We want to confirm if we need to set-up rates for the DUNS + 4s individually? If so, we can send over the additional rate sheets today. This sheet only has 4 rates for the initial month.

Noted on the fees and expected. Thank you!

I wanted to check if you had any time today for a quick phone call to talk through the upcoming timelines. We have availability at 3:30pm to 5pm EST. I can set-up a Teams call and I would include Sam Schmidt from our EDI team.

Please let us know if you have any questions, thank you for all your help!

Paula

Consider the following before taking action: Were you expecting this email? Can you verify the sender? Are the grammar and spelling correct? Does the content or request make sense?

Good morning, Paula.

For the prefix 800 accounts, it is recommended to only request as needed since the turn around is typically one to two business days for two or three rates requested.

Please note, the rates that will be added will only be for the account number prefix 800 and **not** for the account prefix 56.

Due to a large number of rates that will be requested, and since this is a very manual process for us, the request must be processed by the IT department.

As with all rate addition requests, the rate addition process is billed to the supplier requesting the rate additions at \$ 53.00 per hour.

It could be \$ 1,500.00 or more once completed.

Again, this is billed to the supplier that is requesting the rates to be added to the supplier rate table.

Additionally, it could take at least a month for the IT Department to complete the entire process.

Hi Aaron and team,

We are preparing to send the first enrollments on behalf of CPCNH next week and we want to ensure the rates are set-up on your side for the billing system with account numbers using the prefix of 800. We have a version of an Eversource Rate Sheet but the fields are locked and the supplier name and DUNS number is for one of our other internal partners. We would like a version for Calpine Community Energy, LLC that we can update and provide to you this week.

	A	B	C	D	E
1	Supplier's Name	[REDACTED]			
2	DUNS # (Supplier ID)	[REDACTED]			
3					
4					
5	Supplier Letter Code Alpha - Numeric 3 Digits	Supplier Rate Code Alpha - Numeric 7 Digits	Sequence #	\$ / kWh	On / Off Peak
6			01	0.06552	On Peak Energy Charge

Could you please assist or point me to the correct folks to reach out to receive an updated version of the rate sheet?

In terms of timing, we are anticipating sending enrollments for 7 communities as soon as 4/21 or 4/24. Nashua is the largest group of enrollments, do you anticipate any issues with receipt and processing for a volume of ~50K+?

Town
Enfield
Hanover
Harrisville
Nashua
Peterborough
Plainfield

Rye

Thank you!

PAULA WHITE

Hi Daryush,

Thank you for the conversation later in the day also. Yes, I will send out an invite next for tomorrow at 2:30pm. As we spoke about today, please prioritize in the following order if it is possible to meet the enrollment lead times (and update DUNS+4 and connectivity testing):

1. Nashua Cycle 19 Enrollments – goal for Calpine to send by noon Monday, 4/24 (25% of City)
2. Plainfield Cycle 2 Enrollments – goal for Calpine to send by noon Thursday, 4/27 (whole Town)
3. Rye Cycle 3 Enrollments – goal for Calpine to send by noon Friday, 4/28 (half of Town)
4. Harrisville Cycle 4 Enrollments – goal for Calpine to send by noon Monday, 5/1 (majority of Town)
5. **After these first four groups, the Enfield, Peterborough, and Hanover will be needed. The largest group of customers would be the 3K on Cycle 8 for Peterborough.

Cycle	Send Enroll	MRD Date	Enfield, Town of	Hanover, Town of	Harrisville, Town of	Nashua, City of	Peterborough, Town of	Plainfield, Town of	Rye, Town of	Totals
19	4/24/2023	4/27/2023				8,636				8,636

Hi Aaron and Manoharan,

Thank you for meeting with us tomorrow. I tried to add a little more detail for our agenda below – open to changes or additions.

Agenda

1. Quick Introductions / Team Overview
2. Enrollment Ramp on Schedule by Town / Read Cycle
3. Status of EDI Connectivity Testing
 - a. Is it possible to update DUNS + from Enfield to Nashua to meet largest enrollment goal?
 - b. Is it possible to update DUNS + 4 to generic "Community Power" for all?
 - c. Schedule for finishing Connectivity Testing: Next Steps
4. Rate Overview
 - a. Anticipating sending program changes as soon as Day 1 or Day 2 following first Enrollment Power Flow
 - b. If any issues with a billing period, best contact to address exceptions?

Greatly appreciate all your help!

Aaron,

Thank you for all the work you are doing to expedite this. If we can't get Nashua setup, is it possible we can repurpose the Enfield setup that is already setup for Nashua?

Thanks,
Sam

Hi Joby.

Nashua will be set up on the billing systems and EDI connectivity test first per your request.

As mentioned earlier, the supplier agreements were not received until April 13, so it is not possible to get the set ups and EDI testing completed by the April 24th.

We are doing our best to expedite.

Thank you,
Aaron

Aaron and team,

Business is requesting that you please prioritize Nashua if you are going to be doing them one at a time, as that one needs to enroll on the 24th. The rest of them have a little longer, till the 29th.

Thank you,

Joby

Hi Joby.

Unfortunately, the supplier agreements were not received until recently. The IT tickets were submitted just prior to receiving them and only the town of Enfield aggregation is ready for enrollments.

The other towns are not yet set up and the connectivity EDI testing has not yet been completed.

As a result, only the town of Enfield can have EDIs sent for enrollment.

The other towns will need to wait until added to the billing systems and the connectivity EDI testing has been done.

Our IT EDI department is included in this email and may be able to provide an estimated time as to when the billing systems and the connectivity EDI testing will be done for the remaining towns.

Until then, enrollment EDIs for Enfield are the only enrollments that can be sent for now.

Good afternoon, Joby.

The rest of the DUNS + 4 numbers are in the process of getting added to the billing systems.

Once they are, EDI connectivity will need to be done with each DUNS + 4 set up. Frame testing will ***not*** be required.

Aaron and team,

CCE is getting ready to send enrollments as of Monday May 1st. Just wanted to check in on what the plan is for the rest of the DUNS numbers. Do we need to do any additional testing for them? We will be using the same communication identifiers for all of them, the only thing different would be the DUNS+4 in the N1 segment.

Thank you,

Joby

Good afternoon, Karna.

EDI transactions cannot be sent until we have received the remaining required documents.

The below information regarding the required documents was sent to Joby on April 3, 2023.

Now that EDI testing is complete, please provide the three attachments to the NH Public Utilities Commission to complete their registration process.

Please forward the PUC registration completion letter to me once received.

Once we have a copy, the Supplier Services Agreement will be signed by my manager, and EDI can be moved to EDI production.

Thanks for the confirmation @mudaliar, manoharan

@Downing, Aaron J – Could you please look at the below timeline and confirm once ?

@joby.paradiso-francis@calpinesolutions.com – We have created the change request and will be representing in 04/06 CAB meeting.

Once we get the approval we will be deploying the changes into production on 04/07.

Could you please provide the below details,

- Production URL
- Production Credentials
- Production PGP Key

Let us know if you need anything for us!

Thanks & Regards,
Pavankumar VD.

PSNH team, sorry to keep asking about this, but we are waiting on this one last piece so regulatory and legal can move on with finishing up the licensing process with the state and PUC. We had hoped we would be done by now. Your continued support is truly appreciated as we work toward supporting the best interest of our mutual customers.

Thank you,

Joby

Hi Pavan/Joby,

We have sent the Frame 2 and Frame 3 transactions for PSNH accounts. We are working on LPB part.

Could you please confirm if the transactions sent out successfully.

Regards,

Manoharan

Hi @mudaliar,manoharan

Could you please confirm if frame testing is completed or not!
As you raised concern regarding ISA values this morning!

Please confirm 😊

Thanks & Regards,
Pavankumar VD.

Good afternoon.

The DUN has been updated to 118910564 in production on both billing systems.

Please advise if the DUNS + 4 EDI frame test was successful.

If it was, then frame testing should be complete.

If complete, is all EDI testing complete, connectivity, frame testing, etc.?

Hi @mudaliar, manoharan/@Downing, Aaron J

Could you please confirm if frame is completed or not.

@Joby.Paradiso-Francis – Once frame testing is completed we need to get the approval from CAB team.
At the earliest we can deploy it in production on 4/7.

Let me know if you have any concern.

Thanks & Regards,
Pavankumar VD.

Aaron, I noticed that you alluded to the fact that EDI testing was completed in an email to Paul Soco. Can you please confirm? We need to have something from PSNH that we can take to the PUC to prove that this is completed before they can move on to the next steps. Once again we truly appreciate your support so far.

Thank you,

Joby

Hi Manoharan,

The expected duns is 118910564. We might have shared the other duns initially, but it got changed later as that duns was being used for our other subsidiary.

Thanks,
Karna

Hi @Joby Paradiso-Francis

Good Morning,

We have successfully received the file containing the account 56038151040.

@mudaliar, manoharan – Could you please confirm, if you have successfully received the file and processed at your end ?
As we have two different N2 segments in two different files.

Let me know if you have any quires/concern.

N1~SJ~Calpine Community Energy~9~1189105649999^
N1~SJ~Calpine Community Energy~1~118910564^

The screenshot displays the GXS BizManager interface. The top navigation bar includes tabs for Parties, Transformation, Transactions, Operations, Reports, Access, Server, Setup, SecureLink, and Tools. Below this, there are sub-tabs for Failed Operations, Successful Operations, Pending Operations, Sequential Delivery, and Throttling. The main content area shows a list of operations with columns for date, time, sender, receiver, and status. A detailed view of an EDI-X12 transaction is shown on the right, with the following data:

PSNH EDI team, can you please see if the below enrollment came in and satisfied the test requirement or if we need to do it with a different account? Please send the account number if so. We are so close to finish testing, and there are several high profile entities waiting on this to complete. Your prompt response is truly appreciated.

Thank you,

Hi Joby.

The IT EDI department will need to work with you regarding the account number to use.

Please note that the DUNS + 4 value of 9999 needs to be listed in the enrollment EDI.

Aaron and team, we're guessing you wanted us to send an ER for any of the accounts we tested with, so I just queued it for 56038151040. Please let us know when you receive it and if it meets the testing requirement you seek.

Thank you,

Joby

Good morning, Calpine and Eversource.

Please send at least one enrollment EDI listing the **DUNS + 4** value of 9999 (the town of Enfield's value) to ensure the DUNS + 4 processes as expected.

The DUNS + 4 value will need to be listed in all Aggregation EDI transactions.

Thank you,

Aaron

Thanks Karna, We received the requests except for 814HU 80049890488. For this EDI team needs to check their test configuration at their end.

[@Pavankumar V Doddamani](#)/[@Chatterjee, Anandamoyee](#) – Could please check on below issue where 814HU request for is failing. Also for one of the enrollment request for account 56000021071 we have received only one Header record and two detail records for two SAA 877980000 & 043980002. Please check let us know why the 814E Header is missing for second SAA.

Regards,
Manoharan

Thank you, Manoharan.

Please use the supplier 3-digit rate code and the supplier 7-digit code when EDI frame testing enrollments.

The actual rate should not be used in LPB EDIs. I apologize for the confusion.

Please change from this format.

Hi Bryan.

Yes please. Thank you for checking.

Could you please complete a new Master Agreement for the town of Enfield along with an updated EDI trading partner worksheet?

The EDI trading partner worksheet now has place holders for the DUNS+4 values and the town / city name.

Hi Aaron,

We were just looking at our original Master Agreement with Eversource, and I realized the DUNS we provided is now incorrect—it has to do with a snafu with DUNS, the number they provided was actually for a separate Calpine company even though they said it was for CCE.

The correct DUNS for CCE should be: 118-910-564.

Please let me know if you need another form of notice on this, and I apologize for the issue.

Thank you,

Good afternoon, Paul.

Thank you for providing the municipalities and asset id information.

Although the supplier services master agreements and EDI trading partner worksheets have not been received, IT tickets will be submitted to prevent delays for the 9 additional set ups and the EDI testing. Please provide once completed.

Additionally, thank you for being available this afternoon to review the supplier training presentation.

As discussed, once the EDI testing has been completed which should be soon, an EDI completion certificate and letter along with a supplier training presentation certificate will be provided by email.

The three will need to be provided to the NH-PUC to complete the registration process.

Once the letter from PUC has been received, please forward the pdf to me in an email which will complete the processing for the town of Enfield.

Once we receive the letter, the to EDI production can be processed.

Thank you,
Aaron

Hi Paul.

Please provide the 9 supplier service master agreements along with the 9 EDI trading partner worksheets so that IT tickets can be submitted as soon as possible.

Reassigning all communities under one DUNS and one load asset id cannot be accepted.

Puc 2204.06 provides that "(a) Prior to the mailing to customers required under RSA 53-E:7, III, *each CPA planning to use a CEPS to serve CPA customer loads shall confirm with the CEPS and each utility serving the CPA service area the CEPS's ability to use EDI for enrollment of default service customers in the CPA service area, excluding those that opt-out of the CPA, during the CPA commencement month.* (b) ***Each CPA that will serve customer loads as an LSE, or its contracted service provider for customer enrollment, shall: (1) Apply to and successfully complete the testing required to use each utility's EDI in the same manner and on the same terms as a CEPS;*** and (2) If the CPA will provide service on an opt-out basis, demonstrate the ability to use EDI for enrollment of default service customers in the CPA service area, excluding those customers that opt-out, during the CPA commencement month." (emphasis added)

Also, we explained to Clif and Calpine in a 90-minute meeting that our systems can only tell each aggregation apart using the DUNS+4 number. If a CPCNH member were to leave or dissolve or default on payment, whatever, Eversource would have no way to identify which customers would need to be moved to utility default service, as we are required to provide under the Electric Restructuring Act. This is why we met back in January and provided this information – so they would have ample time to do all of the testing required. The aggregations are separate entities, we need to be able to identify them as such to fulfill our obligation as a provider of last resort for energy service.

Aaron,

If we reassigned all communities and load to one load asset under CCE's main DUNS, do I still need to submit unique SSAs and TPAs? I see this type of setup to be the similar to a CEPS serving load across your entire territory using one DUNS and load asset.

Hi Paul.

We already received the ISO-NE assigned asset id numbers from Calpine Community Power.

The load for each town must be reported to ISO-NE separately.

We just need the Supplier Service Agreements and the Trading Partner Agreements for the 9 set ups.

The abbreviated EDI testing should go quickly for each set up on the 14th.

Community	DUNS+4	Asset Name	Asset ID
Enfield		CCE_EVERSRCE_LOAD_3	73694

I apologize, I am not normally involved with the ISO-NE set-up; but, could it be one DUNS and multiple load assets by community?

Paul,

All communities and all loads **cannot** be served under one DUNS and one load asset.

Please submit the 9 SSAs and the Trading Partner Agreements as soon as possible.

The one set up for the town of Enfield that is finishing up the EDI testing can only be used to enroll customers in the town of Enfield.

Good afternoon, Paul.

I think we are good to go. It appears the DUNS + 4 EDI sent was successful.

I will set up a Teams meeting to review the presentation.

This is just a friendly reminder that, as previously discussed with the Coalition and with Calpine, an Electric Supplier Services Master Agreement is required for each municipality set up.

Since Calpine has already completed EDI testing once, it will take less time because Eversource can conduct abbreviated EDI testing for the remaining nine municipalities. It should be noted that each set up on our billing systems and the abbreviated EDI testing could still take as much as one month to complete.

However, Eversource can process several new set ups at the same time with an aim to expedite these necessary steps, but each municipality must have its own SSA executed with its supplier to successfully set it up for service.

Could you please let us know when the other nine (9) Electric Supplier Services Master Agreements and EDI Trading Partner Worksheets (updated version on our website must be used) will be sent so we can begin the 9 set ups?

Aaron,

Is the DUNS+4 the only thing outstanding for edi certification? If so, I think we should be good if we already completed testing on the main DUNS. Do you agree? If so, I'd like to schedule supplier training as soon as possible.

Thanks,
Paul

Paul,

The first 9-digits are unique enough to verify a customer's account.

We will be looking at updating the reports 2204.03, 2205.05 and 2205.13 to list the 11-digits for the LPB accounts.

The 00 workaround should work for the 814 HU EDIs.

Aaron,

Thanks for the update. I guess I did mishear or misinterpret the internal update on edi testing.

Are the first 9 digits unique enough to verify a customer's account should they contact CPCNH's call center? By sync list, do you mean 2205.05 or the supplier sync list? Either way, I believe those are only available for active customers, correct? Would I be able to use the 00 workaround for 867HU requests?

Thanks,
Paul

Hi Paul.

I believe the EDI testing has not yet been completed.

Yesterday it was suggested the DUN+4 EDI enrollment be tested. Additionally, the HU EDI test was not successful.

The LPB AGG reports do not currently list the last two check digits and do match the supplier sync lists that are provided to suppliers upon request.

As a temporary work around, the last two digits for only the LPB accounts can be listed as 00 in the enrollment EDIs.

The actual last two digits will be listed in the enrollment confirmations.

We will investigate getting the last two digits added to the reports.

You're welcome.

Regarding the Supplier Training, perhaps I was mistaken. I heard that we completed testing of the first DUNS earlier this week.

Also, I've seen the 2204.03 outputs sent to me by CPCNH. I'm concerned the LPB files may be incorrect in that the account numbers are incomplete and only 9 digits long? Could you please review and let me know?

Thanks,
Paul

Hi Paul.

I all set on the asset id.

I just need the following.

- **Mailing Address** - Billed to the supplier Sundry's billing department monthly invoices (**for services Eversource provided**).
 - Billed to suppliers for manually adding supplier rates at \$53.00 per hour for the billing system with the account number prefix 800.
 - The billing system with the account number prefix 56 rates are added only by EDI and does not get billed.
 - Billing on a supplier's behalf. Called Complete or Consolidated billing.
 - Minimum \$ 100.00 flat rate or \$.07 per bill dependent on how customers are billed on a supplier's behalf.
 - No charge when a supplier utilizes pass-through (dual billing). Supplier bills the customer directly.

Thank you,
Aaron

Aaron,

Here is the mailing address:

CPCNH
[P.O. Box 840](#)
[Concord, NH 03302](#)

As for the name, I assumed there was a character limit—often 25 characters. If there isn't a character limit, I am actually good with using the following convention for all: Town/City Community Power. For example:

Enfield Community Power

Peterborough Community Power
Nashua Community Power

Does that work?

Thanks,
Paul

Aaron,

This is what I have for Enfield.

Community	DUNS+4	Asset Name	Asset ID
Enfield		CCE_EVERSRCE_LOAD_3	73694

Also for name number, assuming character limits, please use for all setups:

Community Power
1-866-603-7697

Here are the rest of the asset IDs:

Community	DUNS+4	Asset Name	Asset ID
Enfield		CCE_EVERSRCE_LOAD_3	73694
Hanover		CCE_EVERSRCE_LOAD_5	73697
Harrisville		CCE_EVERSRCE_LOAD_6	73699
Nashua		CCE_EVERSRCE_LOAD_8	73701
Peterborough		CCE_EVERSRCE_LOAD_9	73702
Plainfield		CCE_EVERSRCE_LOAD_10	73703
Rye		CCE_EVERSRCE_LOAD_11	73705
Portsmouth		Pending	Pending
Cheshire		CCE_EVERSRCE_LOAD_1	73692
Durham		CCE_EVERSRCE_LOAD_2	73693
Walpole		CCE_EVERSRCE_LOAD_12	73706

Hi Paul.

For now, the name for the Town of Enfield is needed to update the two billing systems.

As mentioned earlier, 25 characters is the limit for the billing systems.

The Town of Enfield should be listed in the name if possible.

Please provide the information for cycle bills for Enfield and we will review before responding.

Thank you,
Aaron

Subject: RE: ISO-LARF and Name on Customer's Cycle Bills

External Sender: Use caution with links/attachments.

Paul,

This is regarding Calpine Community Energy.

Regarding the names to be listed on customer's cycle bills.

The purpose of listing the supplier on the bill is so that customers have someone to contact with any supply issues or to switch providers of supply services. To preserve this purpose, the entity listed on the bill should be whichever entity is prepared to take customer calls, whether that's Calpine, CPCNH, or the Town aggregation. Eversource will need the contact information for whichever entity is going to take customer calls, and that is the entity that can be listed on the bill – these need to match to avoid customer confusion. This process has been confirmed with the Department of Energy.

Please confirm with me which entity will be taking customer calls and provide their contact information to include on the bill along with the entity name, and I will input that information into the systems. Let me know if you have any questions.

Regarding asset id and DUNS+4.

An asset id needs to be set up for each town which will be used when load is being sent to ISO-NE.

Each town will need a separate DUNS+4 number as well.

Please advise when the asset id LARF will be sent to us to review and sign for the Town of Enfield.

Please note that an ISO-NE assigned asset id must be provided prior to the move to EDI production.

Thank you,
Aaron

Aaron,

This question is regarding Calpine Community Energy or Champion Marketing?

Could we use multiple asset IDs and/or DUNS+4s? If so, we'd also like to use different names by asset ID and or DUNS+4?

For example, Nashua Community Power, Peterborough Community Power, Hanover Community Power, etc. Short of that we'd want to use "Community Power" for all.

Thanks,
Paul

Subject: ISO-LARF and Name on Customer's Cycle Bills

External Sender: Use caution with links/attachments.

Good morning, Paul.

I hope all is going well.

Could you please provide an estimate as to when an ISO-NE asset id form will be sent to us to review and sign after Calpine Energy has completed their sections?

An asset id is required prior to moving to EDI production.

Also, could you please provide how the name should be listed customer's cycle bills?

Up to 25 characters (includes spaces) are available. Below are a few suggestions.

Calpine Energy Enfield (22 characters)

Calpine Energy-Enfield (22 characters)

Calpine Community Enfield (25 characters)

Aaron, Pavan and team,

We have an update to make on our IDs. Unfortunately we gave you an incorrect one on the form we sent to you as we were setting up. Please find the form attached with the right one. Hopefully this is an easy change to make and we should be able to test the connectivity faster this time since all else is working fine. Sincerely apologize for the mix up.

Pavan, please let us know when the IDs are changed in your system and we can send the test 997 again.

Thank you,

Joby

Good morning Eversource IT EDI departments.

Please contact Joby as soon as possible to keep the EDI testing momentum going.

There is a tight timeline to get the entire EDI testing completed with Calpine Community Energy.

Thank you,
Aaron

Good afternoon, Joby.

The ITEDI department will provide the data needed to frame test.

Since this is the first aggregation EDI test, a shortened EDI test cannot be done.

Please complete the full EDI testing with our IT EDI departments.

Thank you,
Aaron

PSNH team, now that we are done with connectivity testing can we move on to the actual EDI testing? Don't recall if you sent the test plan, but can you please send it again? Also hoping we can do a shortened test since we already do work with PSNH in prod.

Thank you,

Joby

Hi Pavan,

We did received a file this morning and it was decrypted fine. The only issue I saw was related to our ISA/GS id. Make sure to fix this when next test file is sent.

```
ISA*00*      *00*      *01*006971352T *ZZ*61488031T *210125*0855*U*00401*254665400*0*T*>~

Subject: RE: Calpine Community Energy, LLC's Partially Executed Master Agreement

Hi Pavan,

The file was received and able to decrypt it manually instead of it has to happen automatically. This was issue in EverSource system till 2021 and it was fixed after a suggestion from our team. I had traced back my emails and found that the fix was to setup data format as "MIME multipart/encrypted" instead of MIME. Please make these changes and resend the file. It seems that, the fixed was applied in prod, but ignored in UAT.

Can you also make sure to share the user name/password for us to send files.

Thanks,

Thank you again. This timeframe is a lot longer than we expected. Also, Anthony, to your point, IP 13.83.150.25 is our backup IP, so it makes sense that we have been operating without it. We still need it corrected, so the ticket is still valid. But it now begs the question on why the inbound connection is not working to the test server there when prod works just fine.

Are you able to do wireshark or anything to see where the connection is getting lost or blocked? We can also get our network guys engaged if you have 15 minutes to be on the phone to troubleshoot.

Please let us know if/when you want us to make an attempt so it can be traced.

Thank you,

Joby

Pavankumar VD and All:

I will notify the duty manager to ensure this gets assigned out right away. It will still have to go through the normal process of being submitted for Security Architect approval, then staged, QA'd, and finally implemented on one of our standard firewall change windows. It is likely that this will take until Tuesday March 7 at the minimum before implementation, more likely the Thursday after (March 9).

Subject: RE: Calpine Community Energy, LLC's Partially Executed Master Agreement

Joby:

Interesting that your connection to prod works 100% of the time. IP 13.83.150.25 is not currently allowed, so it must only be using the IP 13.83.23.22 for connections to prod.

[@Joby Paradiso-Francis](#), do we need to continue to allow these connections over https/443, or are we wanting to switch this to sftp over port 20022?

[@Pavankumar V Doddamani](#) The connections needed are:

Both IP's 13.83.23.22 and 13.83.150.25 need to be allowed to access both sftp://slinkprd.nu.com - 159.108.5.77 and sftp://slinktst.nu.com - 159.108.4.79

We need final confirmation from Joby as to whether this needs to have https/443 allowed, or sftp 20022.

Subject: RE: Calpine Community Energy, LLC's Partially Executed Master Agreement

You don't often get email from anthony.boterf@eversource.com. [Learn why this is important](#)

External Sender: Use caution with links/attachments.

Joby and All:

The current rule has 13.83.23.22 and 13.83.23.25 allowed to slinkprd on https. Please confirm the following:

The IP 13.83.23.25 in the current rule should be corrected to 13.83.150.25.

Both IP's 13.83.23.22 and 13.83.23.25 need to be allowed to access both sftp://slinkprd.nu.com - 159.108.5.77 and sftp://slinktst.nu.com - 159.108.4.79.

The port that we currently allow is https/443. Confirm whether we need to allow https/443 for both prd and tst, or if we need to change this to sftp over port 20022 to align with our current standards.

[@Chatterjee, Anandamoyee](#) Could you or someone on your team please submit a firewall change request for these connections, once Calpine has confirmed the exact details of the connections per above?

You don't often get email from anthony.boterf@eversource.com. [Learn why this is important](#)

External Sender: Use caution with links/attachments.

Hello Everyone:

The firewall rules are written to allow connection to slinkprd server, but these sources are not in any of the slinktst server rules. I also think there was a typo in the two source IP's, as our rule contains 13.83.23.22 and 13.83.23.25, as opposed to the 13.83.150.25 as indicated in the email thread below. Also confirmed that these sources are being allowed on https/443, not 20022. Most of our new connections are only being approved to use either 2022 or 20022, so that may be something to consider switching to.

Also for future reference in this thread:

sftp://slinkprd.nu.com - 159.108.5.77
sftp://slinktst.nu.com - 159.108.4.79

Name	Source	Destination	VPN	Services & Applications	Action
	 x.calpine.13.83.23.25  x.calpine.13.83.23.22	 slinkprd.nu.com	 * Any	 https	 Accept

Hi Pavan,

This is https connection. Also let us know, where did you setup our profile for test? Is it on test or prod?.

We are able to reach the production url <https://slinkprd.nu.com/ipnet/naesb>, but having issues with test url <https://slinktst.nu.com/ipnet/naesb>.

I think, it would be better to get in call and get into same page from all parties. Please suggest a good time today to schedule a quick call.

Hi [@Firewalls-ADS](#) Team,
Good Morning,

Our suppliers are facing connectivity issue.

Could you please check if the below IP are whitelisted to ES network!

- Source IP - 13.83.23.22 / 13.83.150.25
- Destination - 159.108.5.77 / 159.108.4.79
- Service – sftp://slinkprd.nu.com
- Port – 20022

Could you please check and confirm!

Thanks & Regards,
Pavankumar VD.

Pavan and team,

Our network team traced the routing and came up with the conclusion that we have no blocking, seems to be an IP address white listing issue. Can you please confirm the below two IPs are whitelisted on your uat site?

13.83.23.22 and 13.83.150.25

Thank you,

Joby

Good morning.

Thank you for keeping me in the loop.

Since the C2 set up will be completed on Sunday and Monday is a holiday, if EDI testing can begin next week, can you please set the start date for later in the week.

I believe I need to add the supplier to C2 after the set up is completed by your departments before EDI testing can begin.

Thank you,
Aaron

Hi Joby.

The IT EDI department provided the following *estimates*.

ETA for setting up Calpine community energy is 19th Feb.

We can start EDI testing from 20th Feb.

Aaron and team,

Please find the EDI trading partner form filled out. We do sincerely apologize for the delay in getting this going since we reached out to you early December, but now we are focused on getting the EDI certification done as soon as PSNH can facilitate us. Please let us know if there is anything else you need at this time before our EDI certification testing can be scheduled.

Thank you,

Joby

Subject: RE: Calpine Community Energy, LLC's Partially Executed Master Agreement

Good afternoon, Bryan.

In order to begin the supplier set up on our billing systems, we need EDI Trading partner worksheet for Calpine Community Energy.

Additionally, please provide the W9 (tax identification form).

Once the above have been provided, IT tickets will be submitted to begin the process of setting up Calpine Community Energy on our two billing systems and for EDI testing after the set ups are complete.

Regarding page 19 listing number 9. Supplier training was previously attended by Calpine Solutions but it was explained to us that Calpine Community Energy is not part of Calpine Solutions so it appears the supplier training will need to be reviewed just prior to the move to EDI production.

Attached is the supplier rate addition template that is used only for the account number prefix 800 accounts.

Please provide 3 rates that will be used while EDI testing the prefix 800 accounts (attachment).

Hi Aaron,

As we had discussed in late March/early April, here are revised master agreements for the various DUNS plus 9 forms that capture the corrected DUNS numbers as well as the corrected bank account information (please note the bank account number has been updated).

I think this captures everything outstanding, but please let me know if I can provide anything else here.

Thanks,
Bryan

Good morning, Cliff.

Thank you for sending the Documentation of Notice of CPA Commencement of Services.

This is just a friendly reminder that, as previously discussed with the Coalition and with Calpine, an Electric Supplier Services Master Agreement is required for each municipality set up.

Please note that we have only received one Electric Supplier Services Master Agreement for the town of Enfield from Calpine Community Energy.

Since Calpine has already completed EDI testing once it will take less time because Eversource can conduct abbreviated EDI testing for the remaining nine municipalities. It should be noted that each set up on our billing systems and the abbreviated EDI testing could still take as much as one month to complete. However, Eversource can process several new set ups at the same time with an aim to expedite these necessary steps, but each municipality must have its own SSA executed with its supplier to successfully set it up for service.

Thank you,
Aaron

TO: NH PUC Clerk's office,

Attached please find a letter to the PUC transmitting our attached original emails of 3/6 and 3/7/23 providing notice of commencement of services of CPA services for 10 member municipalities. This is being sent at the PUC Clerk's office request that the notice be put in PDF format for postings to the dockets for these member EAPs.

The people copied on this email are those that were on a service list for the 10 dockets listed in the attached, which were the PUC dockets for approval of Electric Aggregation Plans (EAPs) for the 10 Members launching services in the last few days of April or in May.

Pursuant to current PUC direction, this filing is only being made electronically.

✉ jecourtney820@gmail.com
1 attachment -Expires : Dec 13, 2023

Good afternoon Jo-Ellen.

The attached is the report in response to the request pursuant to Puc 2203.02. Please note that all information is provided except for that listed in Puc 2203.02(b)(5): historical past due accounts receivable. The Public Utilities Commission has granted Eversource a waiver from this part of the rule, as Eversource's systems do not collect or retain this data, and therefore the company is unable to provide it. However, this waiver is only for historical past due accounts receivable; current past due accounts receivable information is included in this report.

There were a couple of rate classes in the 2203.02 report with 50% or more total usage.

As a result, based on the rules, the rate classes were combined leaving one rate class.

Have a great rest of the day!

Aaron
