RE: FY2024 Residential Renewable Electrical Generation Rebate Program lottery

To Interested Persons

The Department of Energy issued a memo on September 7, 2023, which allocated \$356,000 in funding to the Residential Renewable Electric Generation Program (Program), scheduled the opening of the Program to new applications from September 13, 2023, to October 13, 2023 and approved the use of a lottery process to determine applicant queue positions. The Department received 474 applications during the open period.

The Department of Energy issued a memo on September 7, 2023, which allocated \$356,000 in funding to the Program. The Department approved an additional Program budget allocation from the Renewable Energy Fund (REF) on December 4, 2023, for fiscal year 2024 (FY24), to result in a total allocation to the Program of \$474,000. We expect funding to be available for all eligible applicants that submitted applications during the September 13-October 13 open period. .

A public lottery process was held on November 20, 2023, to determine queue positions for the 474 new applications received between September 13, 2023, and October 13, 2023. Applications will be processed in the order determined by this randomized ordering. A record of the queue results is posted to the Department of Energy website and customers will be directly notified of their queue positions in the coming days. Please be advised that queue positions are not a guarantee of funding. Funding reservations and rebate disbursements are contingent upon the application and project meeting all Program terms and conditions.

Thank you for your patience as we move through the application process.
